OTHER DOCUMENTS (AD47)

Under the Designs Act, 2000

Title of the Article: **EDGE-AI SIGN LANGUAGE TRANSLATION KIOSK WITH WIRELESS SENSOR GLOVE**

1. **Brief Description of the Article**: The present design relates to a portable counter-top Edge-AI sign language translation kiosk with a companion wireless sensor glove. The kiosk comprises a compact box-shaped enclosure with an angled privacy hood housing an integrated depth camera and dual MEMS microphone array, a front-facing 10-inch angled touchscreen display for dynamic 3D sign avatar demonstrations and real-time subtitles, a directional speaker grille, rear thermal exhaust ventilation, I/O bay with IEC power inlet, Ethernet and Kensington lock, and a heavy anti-tip weighted base with cable management channel and anti-slip rubber feet. The companion wireless sensor glove features five resistive flex sensors along each finger dorsum, a 9-axis IMU (accelerometer, gyroscope, magnetometer) on a wrist-mounted PCB module, Bluetooth Low Energy transmitter, rechargeable LiPo cell, LED status indicator, and an adjustable velcro wrist closure strap.

2. **Statement of Novelty:** The novelty of the present design resides in the shape, configuration, and surface ornamentation of the "EDGE-AI SIGN LANGUAGE TRANSLATION KIOSK WITH WIRELESS SENSOR GLOVE" as illustrated in the accompanying representation sheets.

3. **Disclaimer:** No claim is made for any mechanical, functional, optical, or operational features of the article. Protection is sought solely for the aesthetic features of the design as shown in the representations.
